Installation Instructions:

Rechargeable Motion Sensor Cabinet Lights can be installed at any indoor location to enhance the ambiance or to make your life convenient. Some popular Applications are Kitchen cabinets, Wardrobe Closets, Bookshelves, Stairs & Steps, Drawers, Beds, passages, refrigerator, etc.

- 1.The Cabinet Lights are equipped with built-in magnet so it can be attached to Iron, Nickel, and Cobalt surfaces without using any other tools or accessories.
- 2.Magnetic Iron holders with adhesive stickers (2 pcs) are used to stick the cabinet lights on a non-metallic surface.

Operating Instructions:

- Charge the batteries for 2-3 hours before using them for the first time through the USB Cable with a micro pin (included). There is a charging indicator light. An indicator light turns red when the batteries are charging, and the indicator light turns green when the batteries are fully charged.
- 2 modes are available through the Push Button1.

1.Constant Light mode: Push the button once to turn on the product. The Cabinet Lights by default will work on Constant Light mode where the lights will be on till the battery lasts.

2.Auto Mode: Push the button again to activate the Auto Mode (Motion Sensor + Light Sensor) In this mode, the lights will only turn on when the PIR Sensor detects any moments within 3 meters and in a dark environment and turn off after 15 seconds. When the environment is bright enough, the light will not turn on even on motion detections.

- To turn off the lights, please press the push button again.
- Adjusting Brightness: Please hold the push button for 3 seconds to adjust the brightness from 10% to 100%.
- SOS (Blinking Light) Activation: Hold the push the button for 6 seconds to activate the SOS mode where the lights will keep blinking till the batteries last.
